

SSTP VPN set-up guide for Windows 8

Access anything from anywhere in the world.

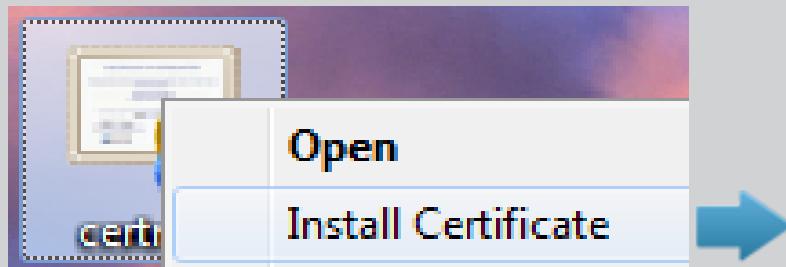

Step 1

To connect with SSTP you will need to install on your local computer the security certificate from our CA. This is required by the SSTP protocol...

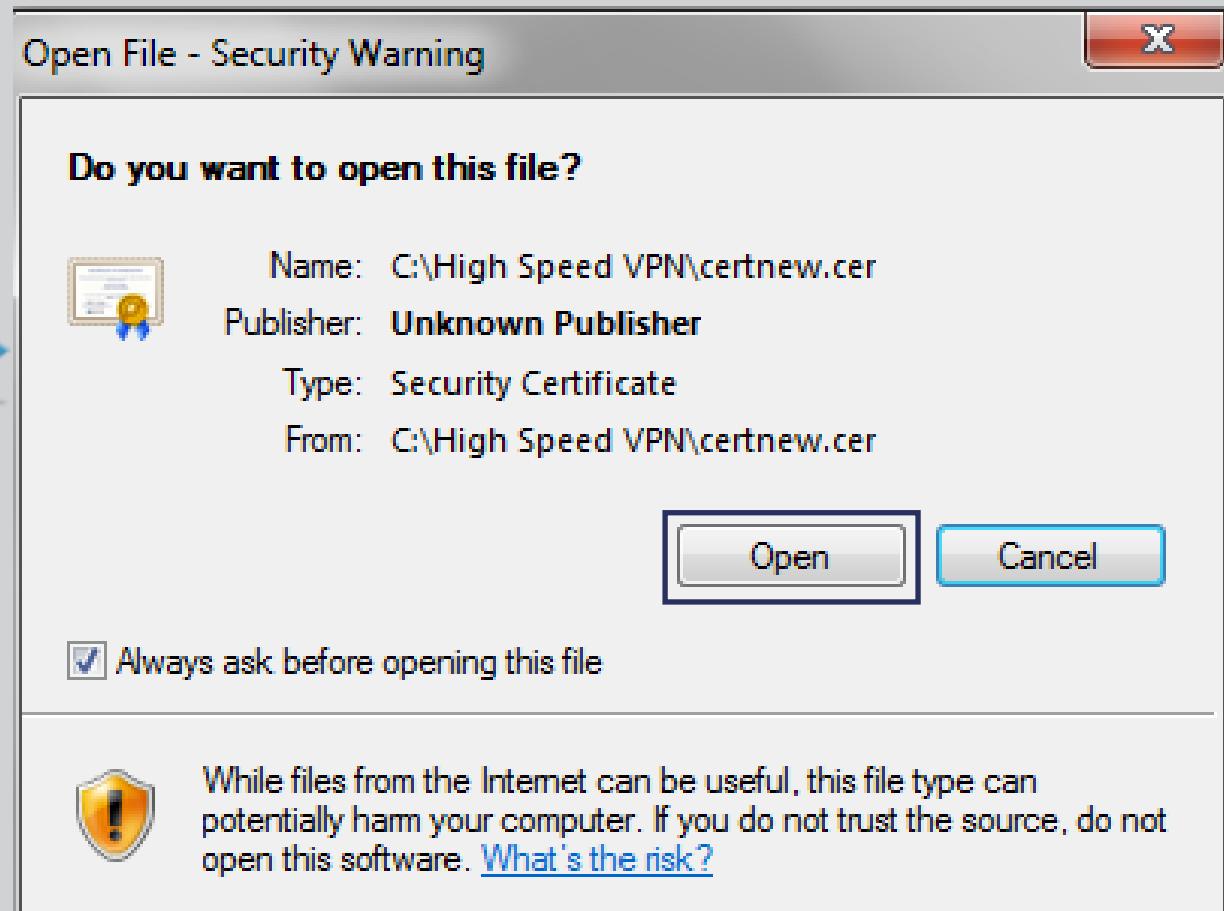

To get started save the "certnew.cer" file from your greeting mail to your computer.

Right click it and select

"Install Certificate".

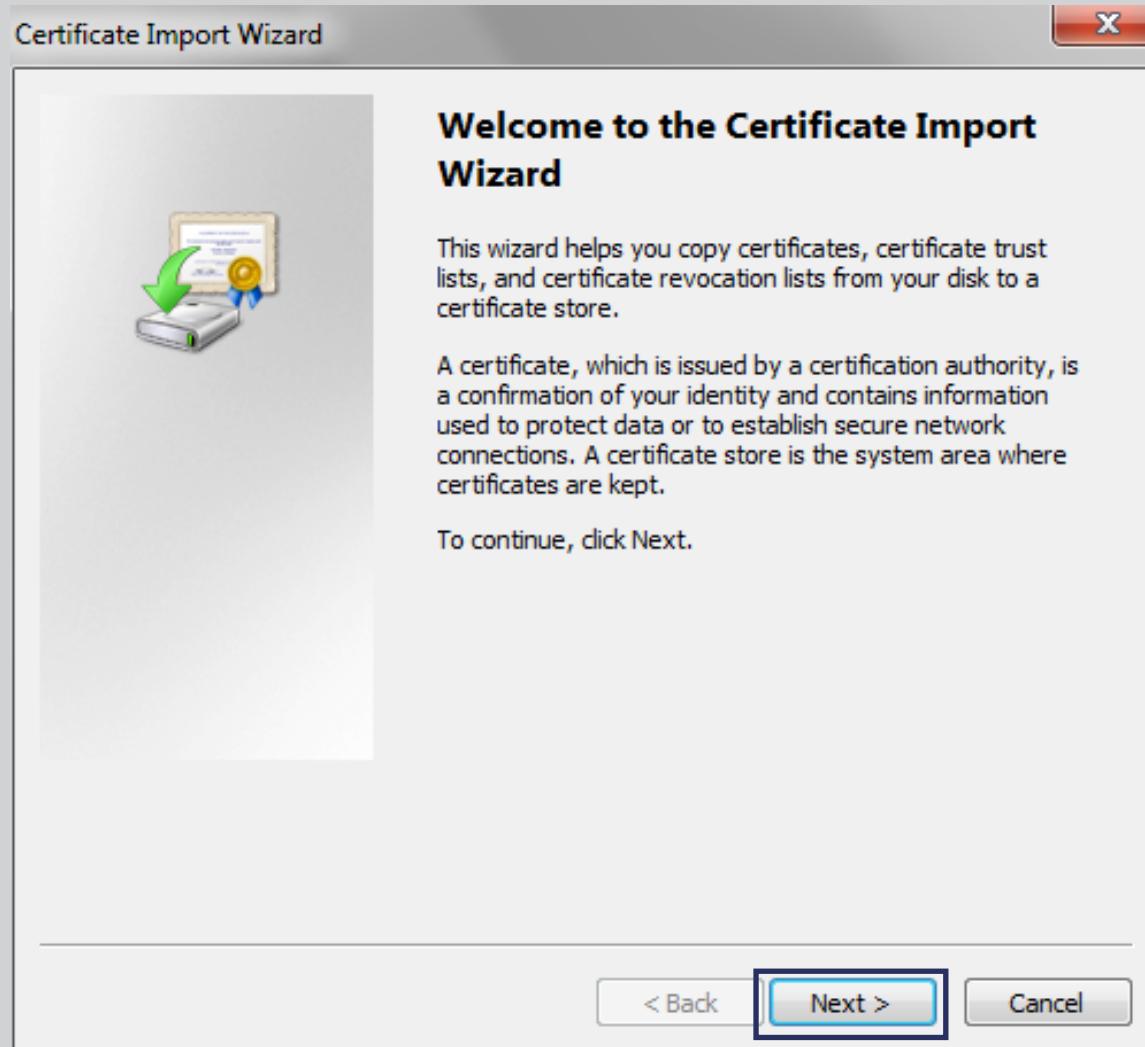

**Click "Open" on the
Security Warning window.**

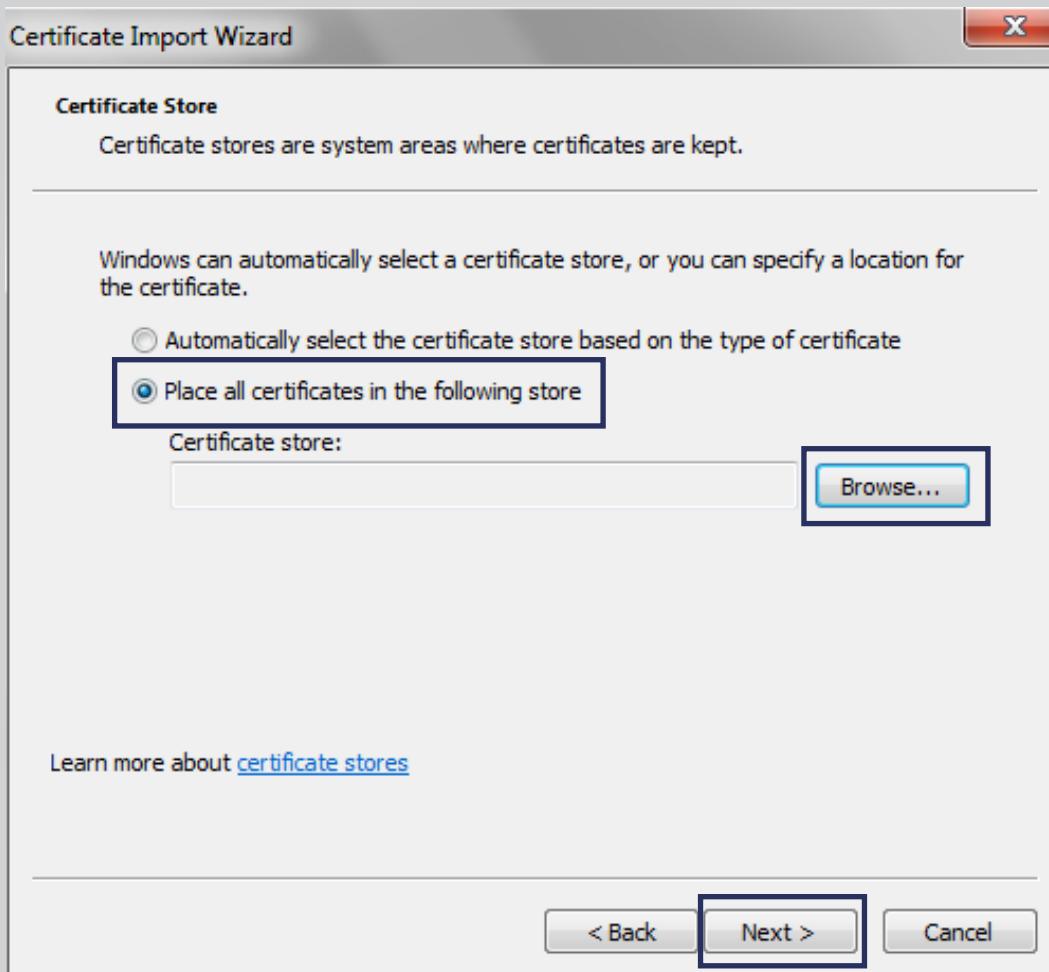

Step 2

Click "Next".

Step 3

a) Select the "Place all certificates in the following store" option and click "Browse."

b) Check "Show physical stores".

Select the "Trusted Root

Certification Authorities ->

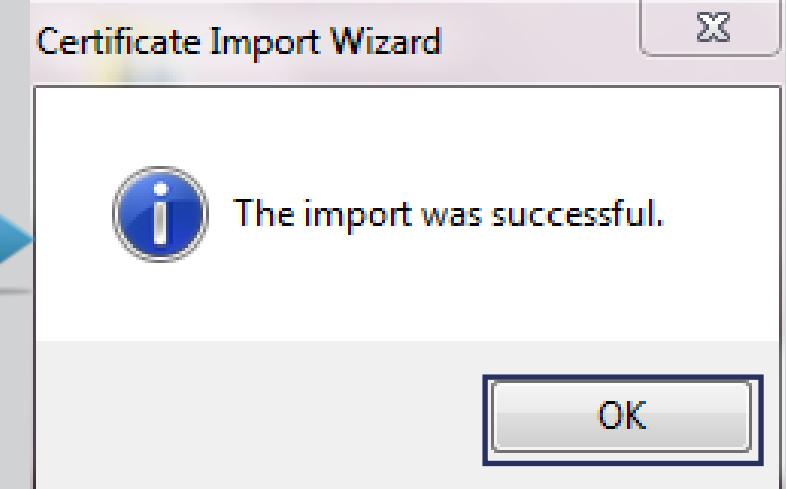

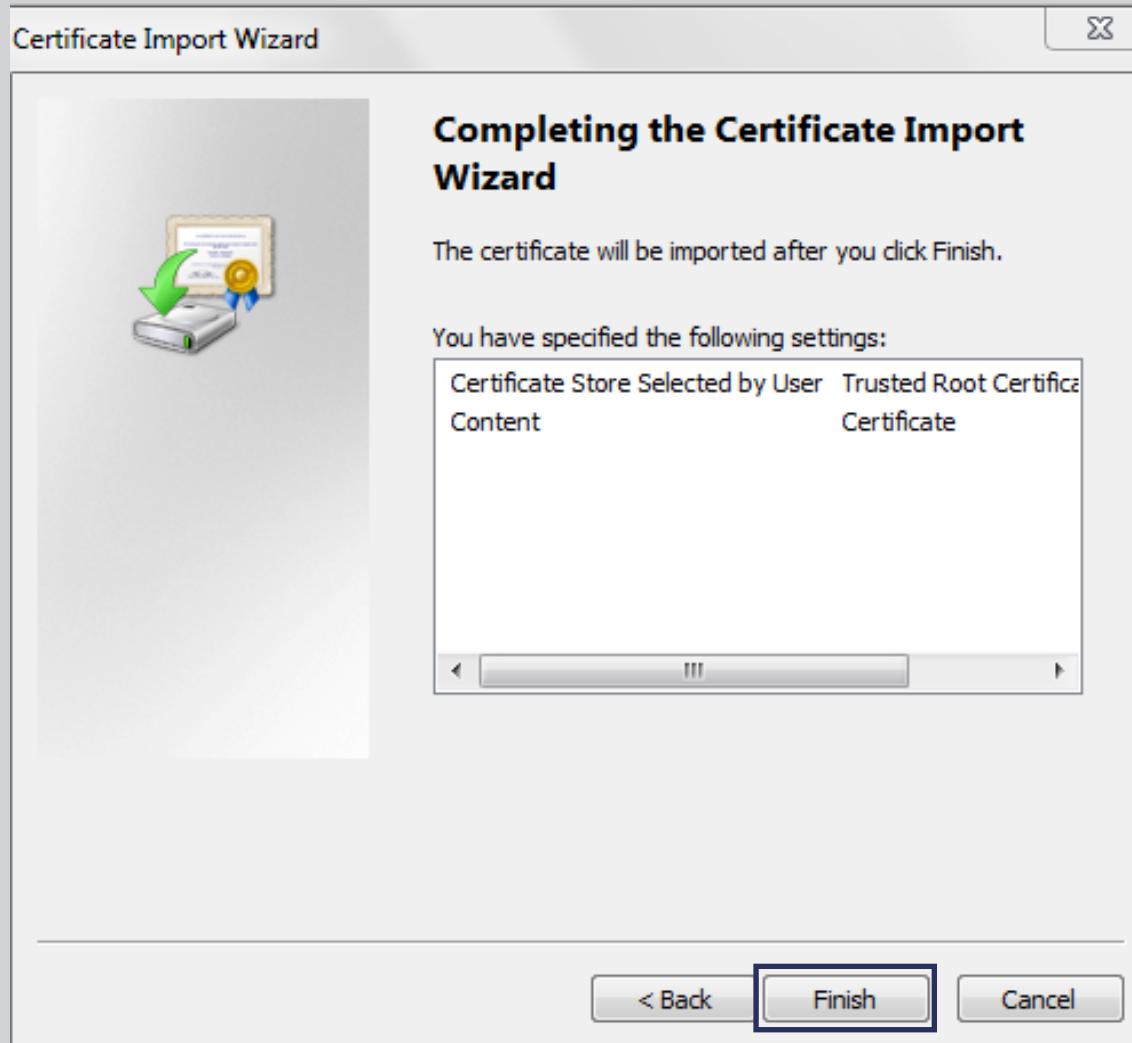

-> Local computer" and click "OK".

c) Click "Next".

Step 4

Click on "Finish" and then on "OK". You have successfully imported the certificate !

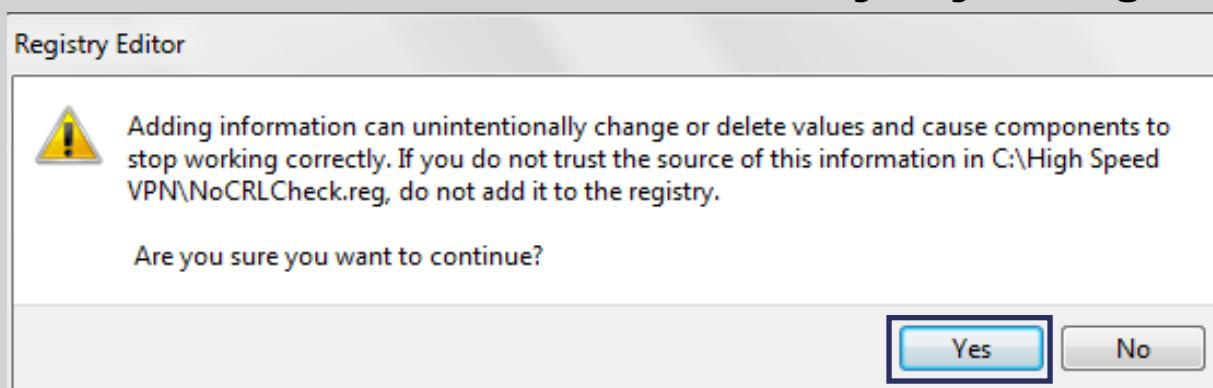

Step 5

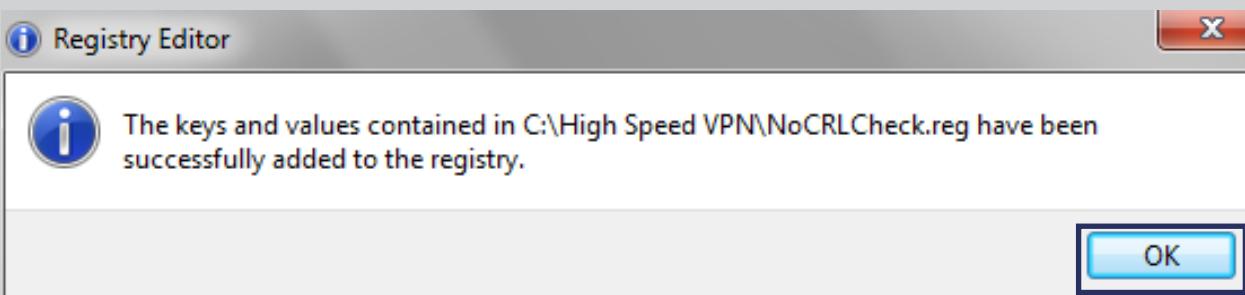

Save the "NoCRLCheck.reg" file from your greeting mail to your computer and double click on it.

Name	Date modified	Type	Size
certnew	7/10/2010 10:20 PM	Security Certificate	1 KB
NoCRLCheck	7/19/2010 7:56 PM	Registration Entries	1 KB

Select "Yes". This will add a new key in your registry to optimize SSTP VPN performance.

You have successfully imported the key. Click "OK".

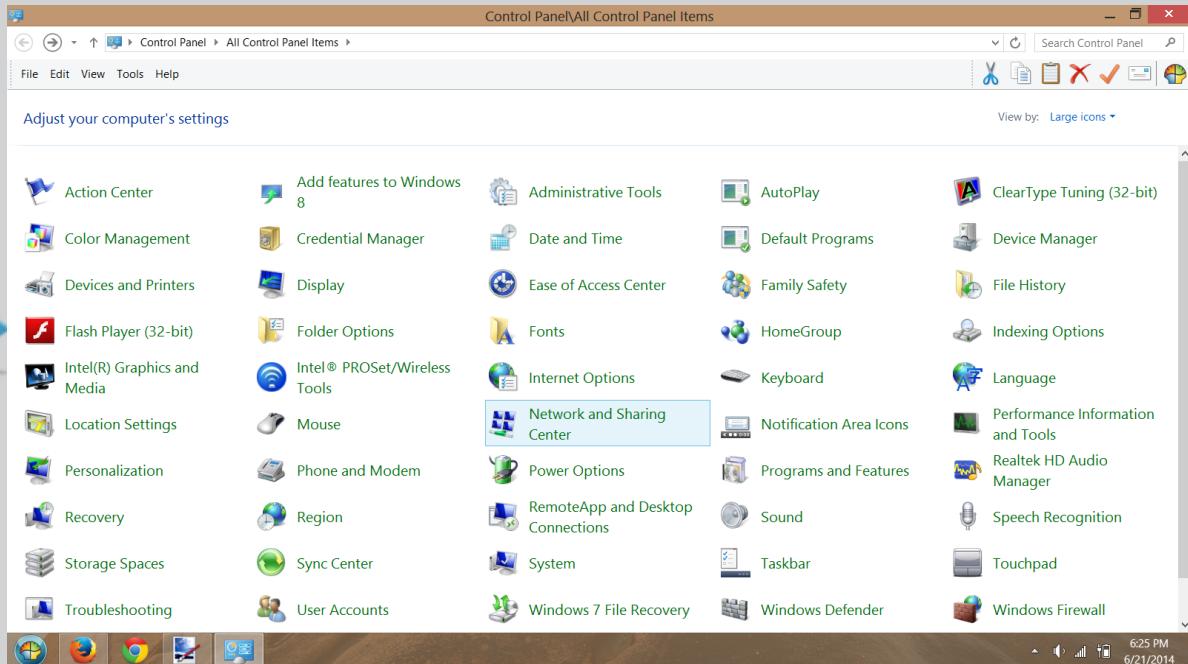

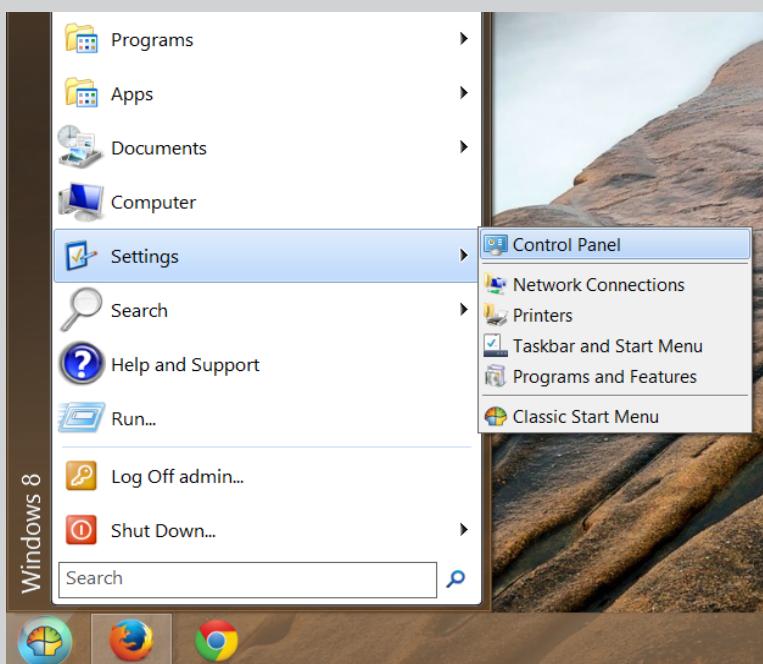

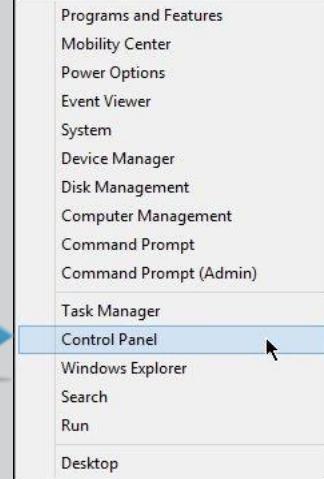

Step 6

Go to the Windows 8 Start Button and click on "Control Panel".

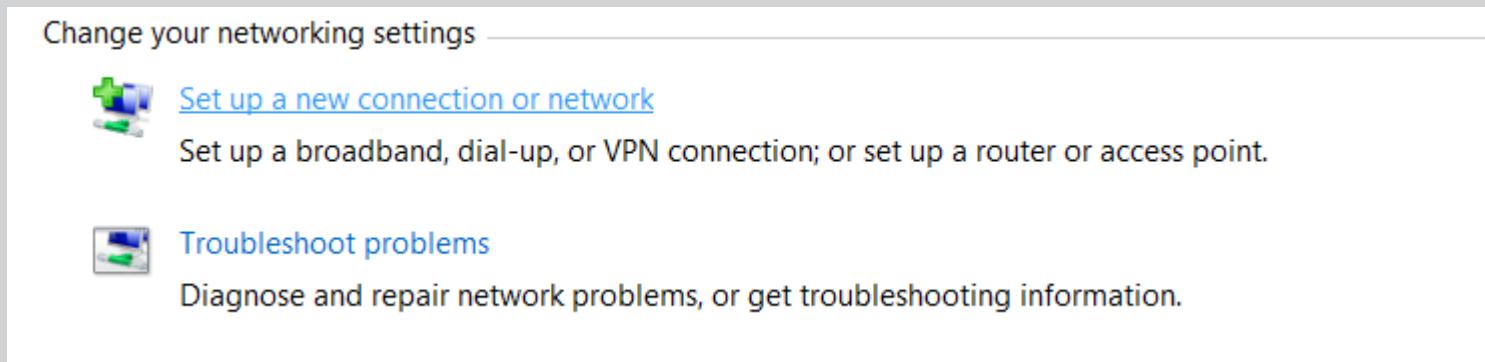

Or if you don't have your start button enabled right click in the bottom left corner and select "Control Panel" from the menu.

In "Control Panel" click on "Network and Sharing Center".

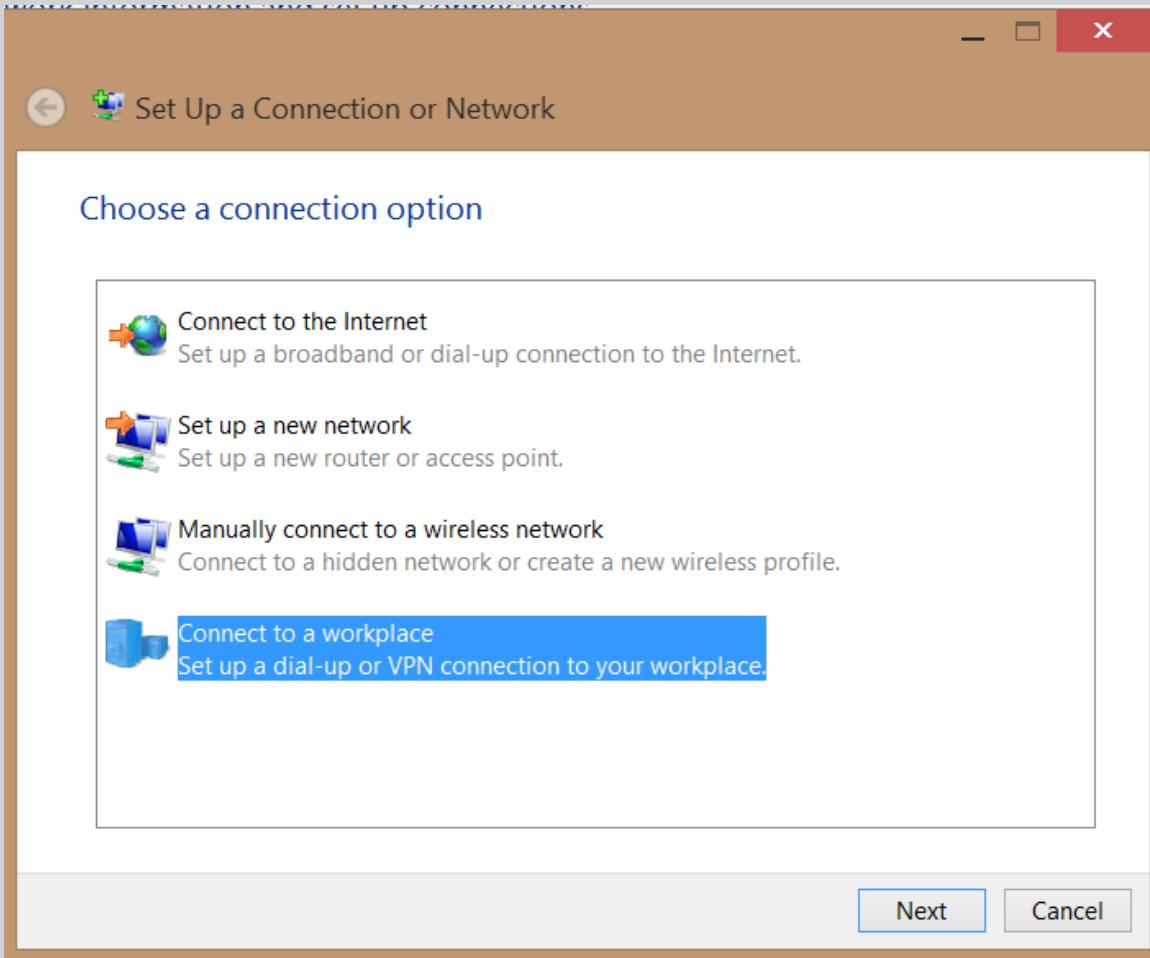

Step 7

In the "Network and Sharing Center" click on "Setup a new connection or network".

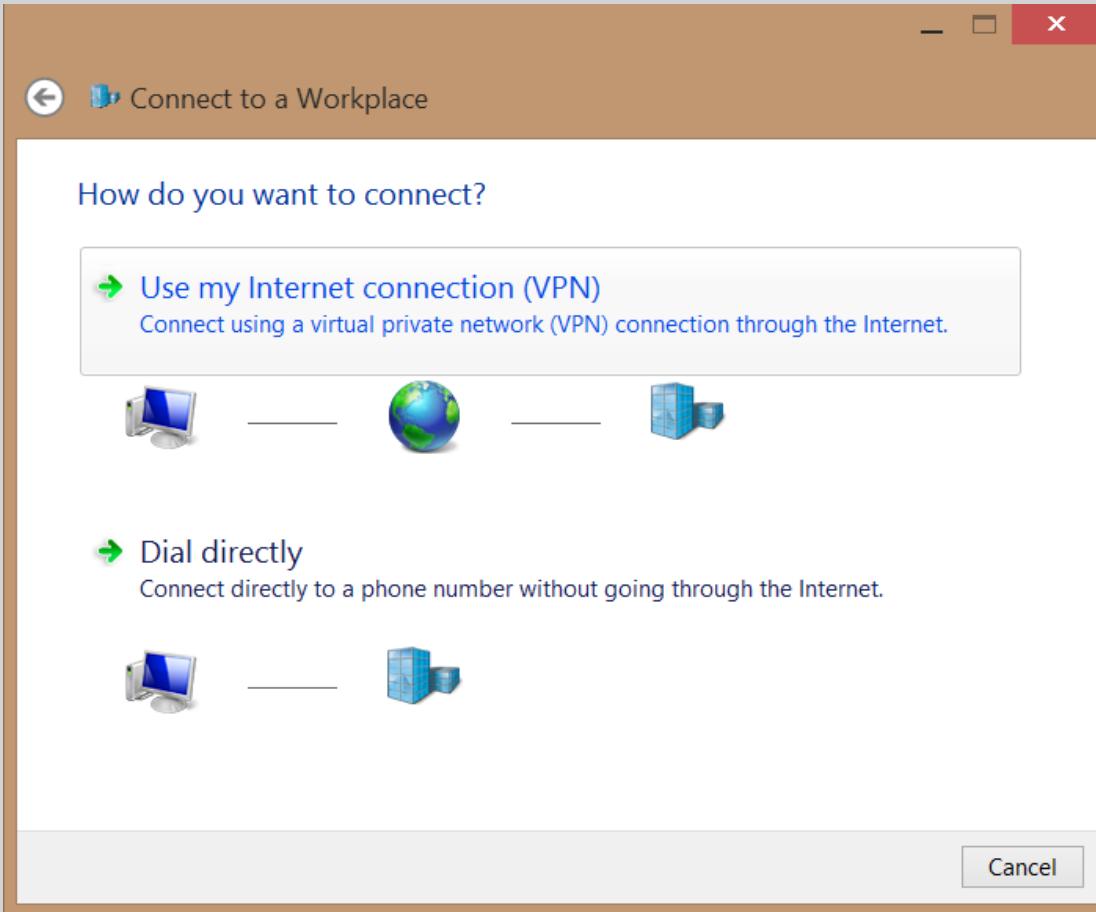

Step 8

Select "Connect to a workspace" and click "Next"

Step 9

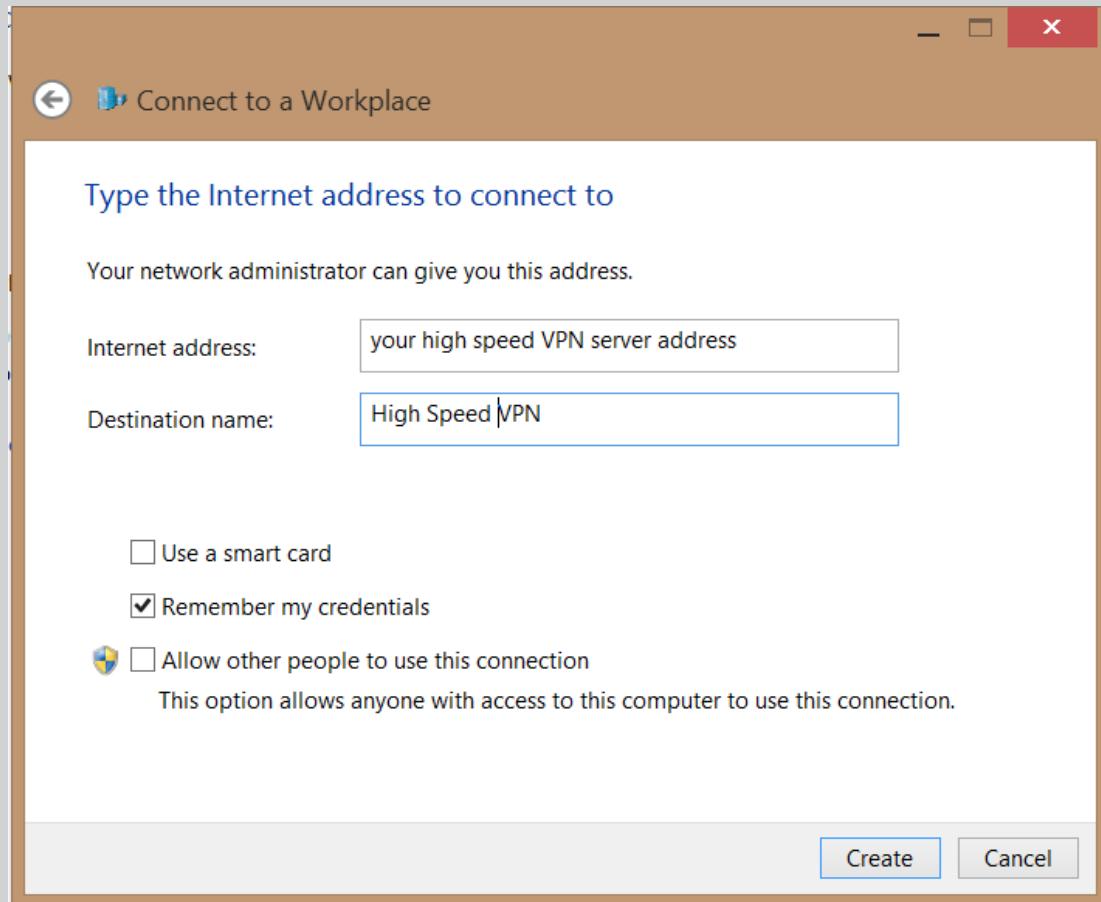

Click "Use my Internet connection".

Step 10

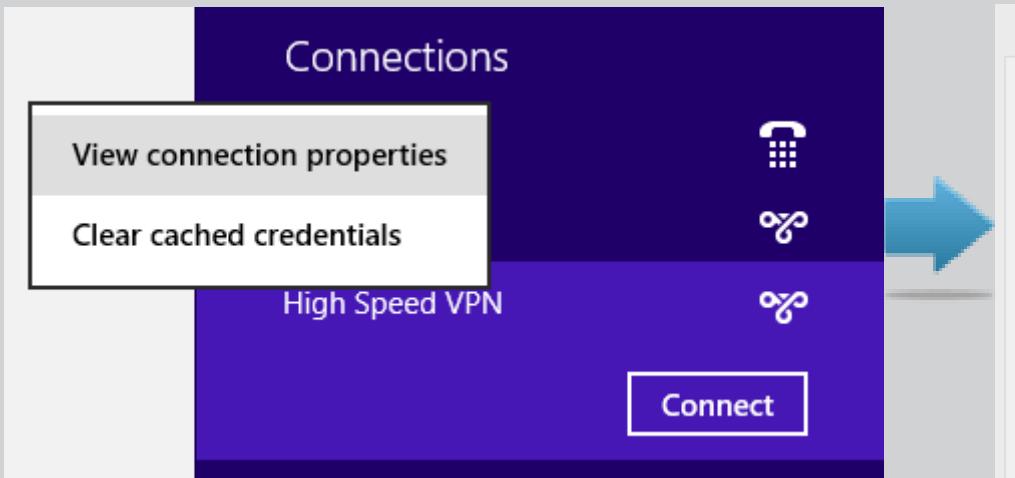

Enter the server address from your greeting mail in the Internet Address box.

Enter "High Speed VPN" for destination name. Click "Create".

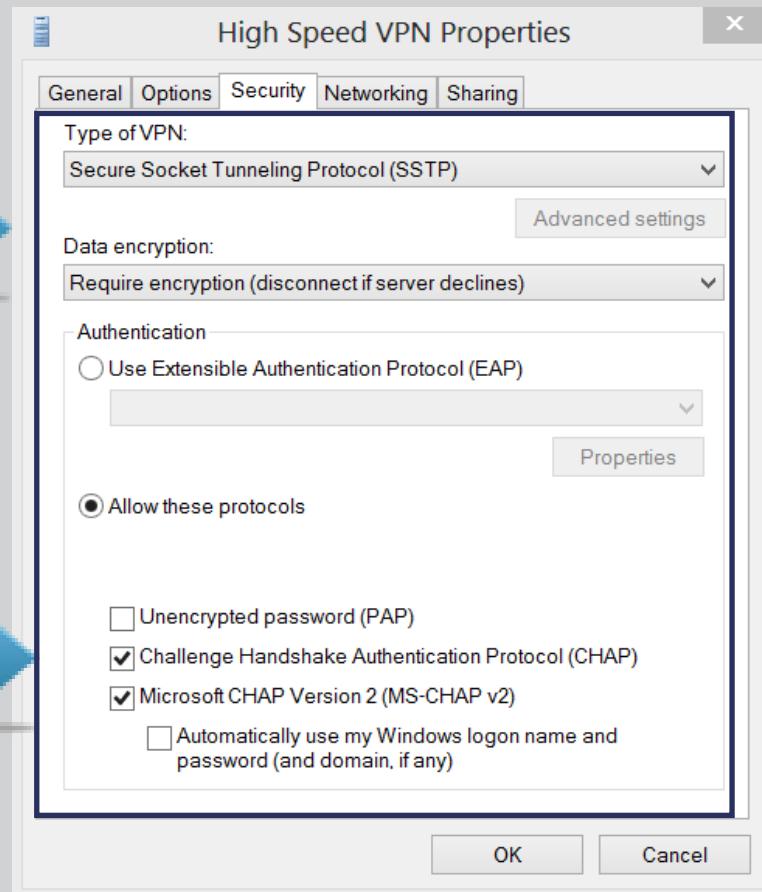

Step 11

a)Select "Properties" on the "High Speed VPN" newly created connection.

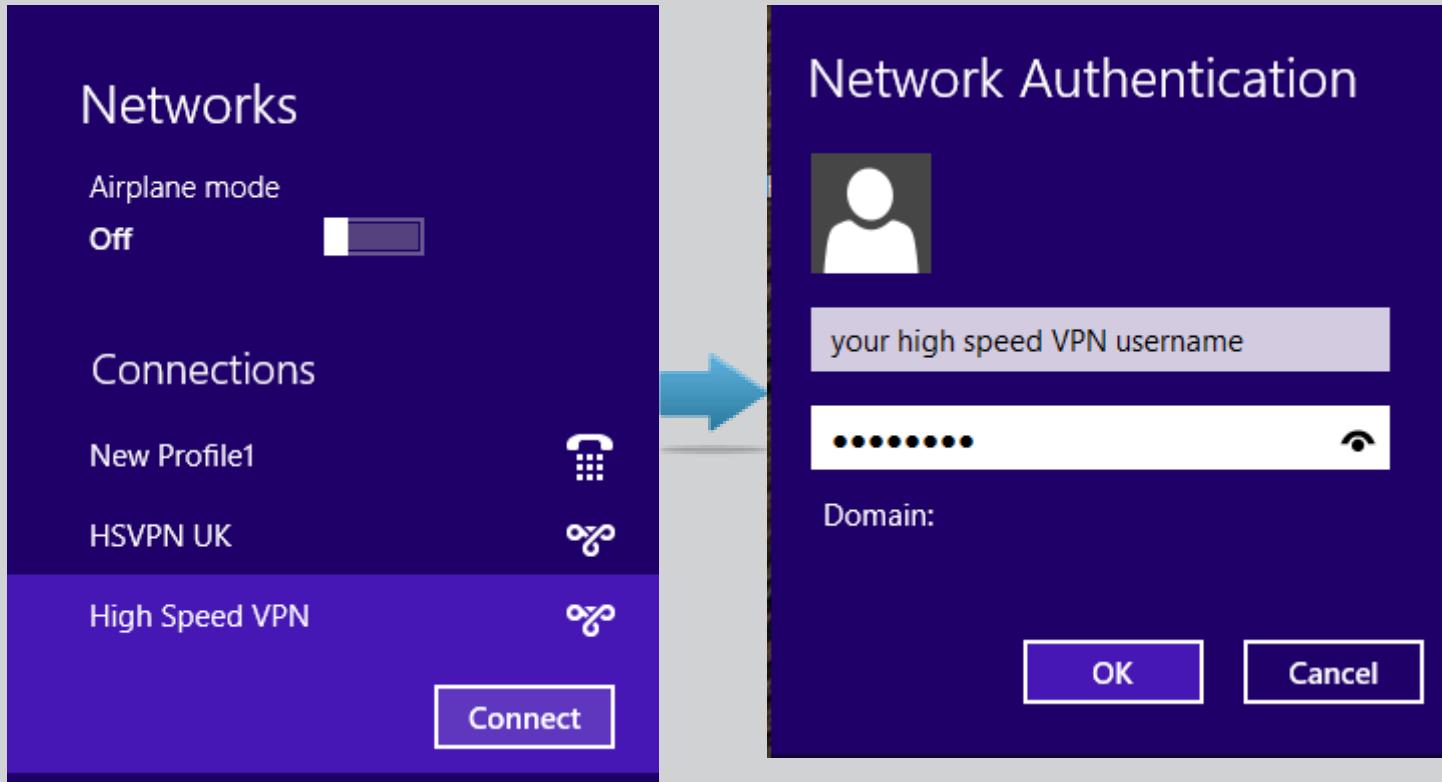

Please make sure that:
- 'Type of VPN' is 'SSTP'
- 'Data encryption' is set to 'Require encryption'
- 'Allow these protocols' is selected
- 'PAP' is not checked
- 'CHAP' is checked
- 'MS-CHAP v2' is checked
- 'Automatically use my Windows logon..' is not checked.

b)Go to the "Security" tab and make sure that your settings are the same as below. Click "OK" to save.

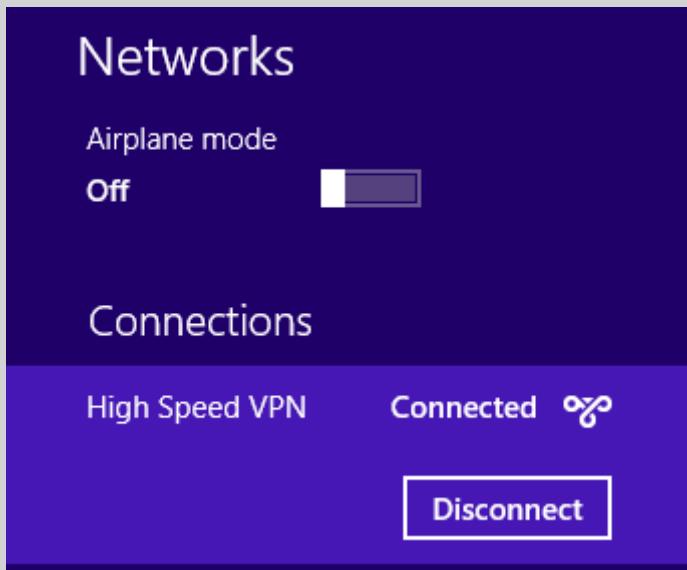

Step 12

- a) Click "Connect" on the "High Speed VPN" connection in the "Connections" tab.
- b) Enter your HSVPN username and password and click "OK" to connect.

Congratulations !

You are now connected to High Speed VPN:

Thank you for your time and consideration.

**Please contact us if you have any problems setting up
your connection with High Speed VPN.**

**We will answer as soon as possible,
but no more than 12 hours.**

Kind regards,

HVPN Team
