L2TP VPN setup guide for Mac OS X
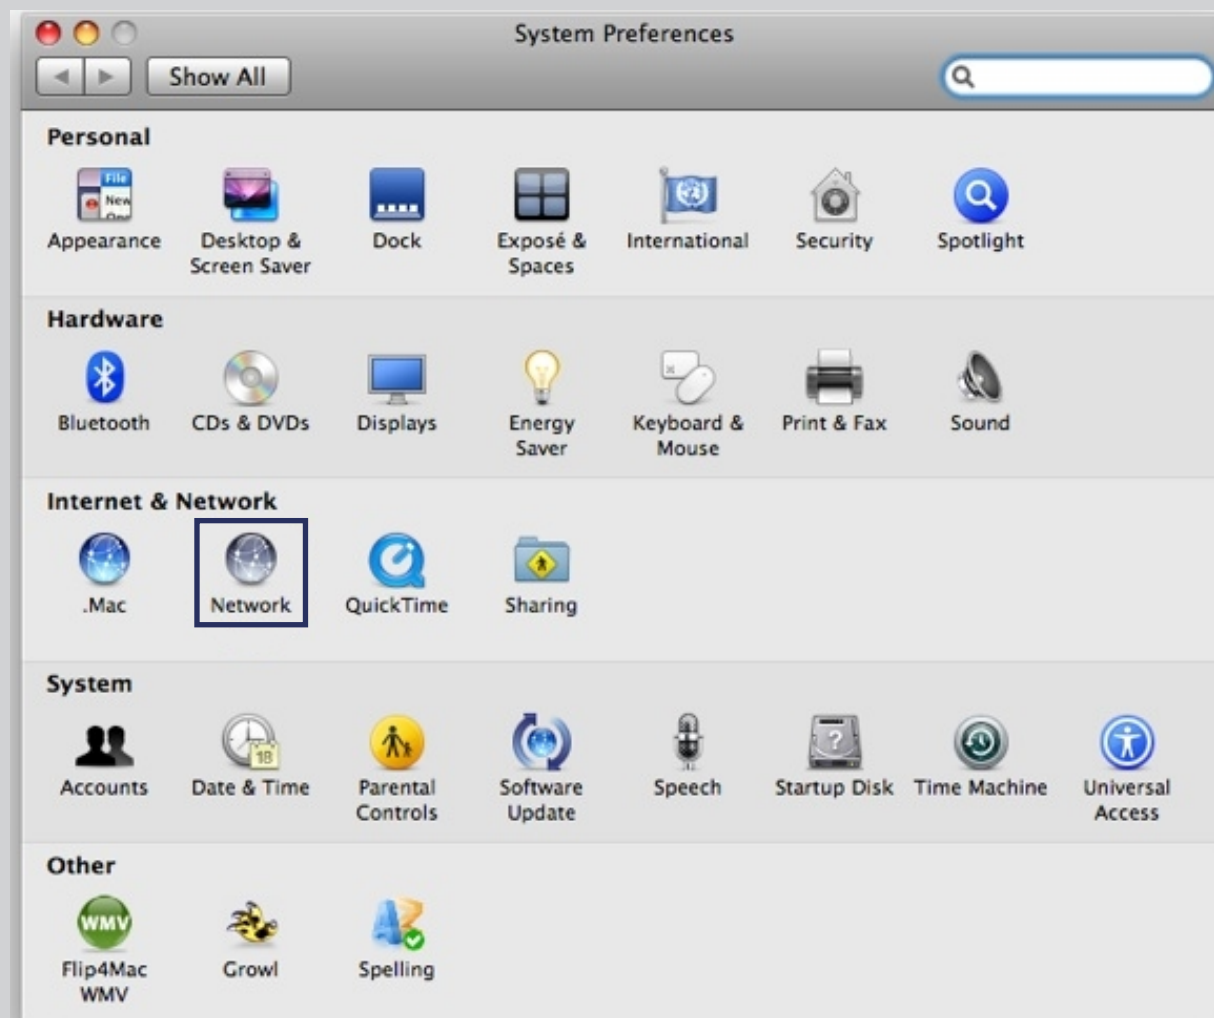

Access anything from anywhere in the world.

www.highspeedvpn.com
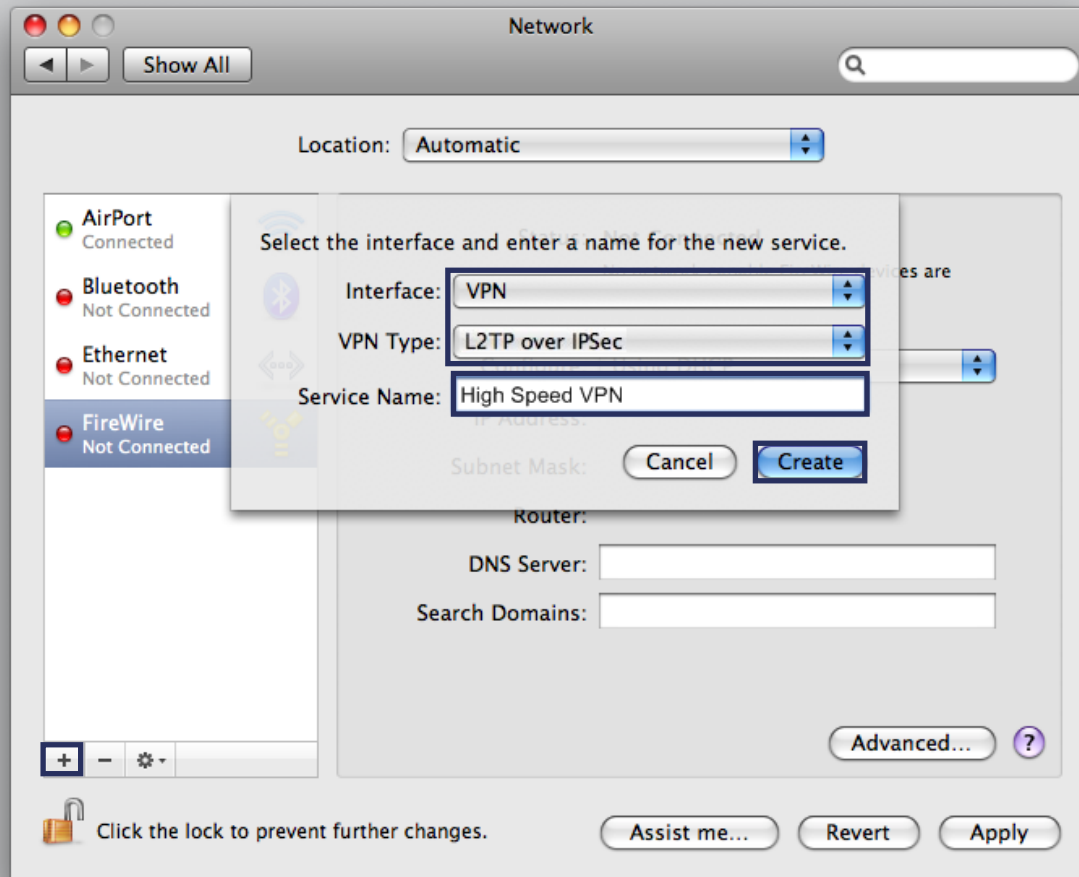

Step 1

Open "System Preferences" and select "Network".

Step 2

Click on the "+" in the bottom left corner and select VPN for "Interface" and **L2TP** for "VPN Type". Input "High Speed VPN" for **"Service Name"** and click **"Create"**.

Step 3

a) Input the High Speed VPN Server IP and user name we provided you in the greeting mail and click on "Authentication Settings".

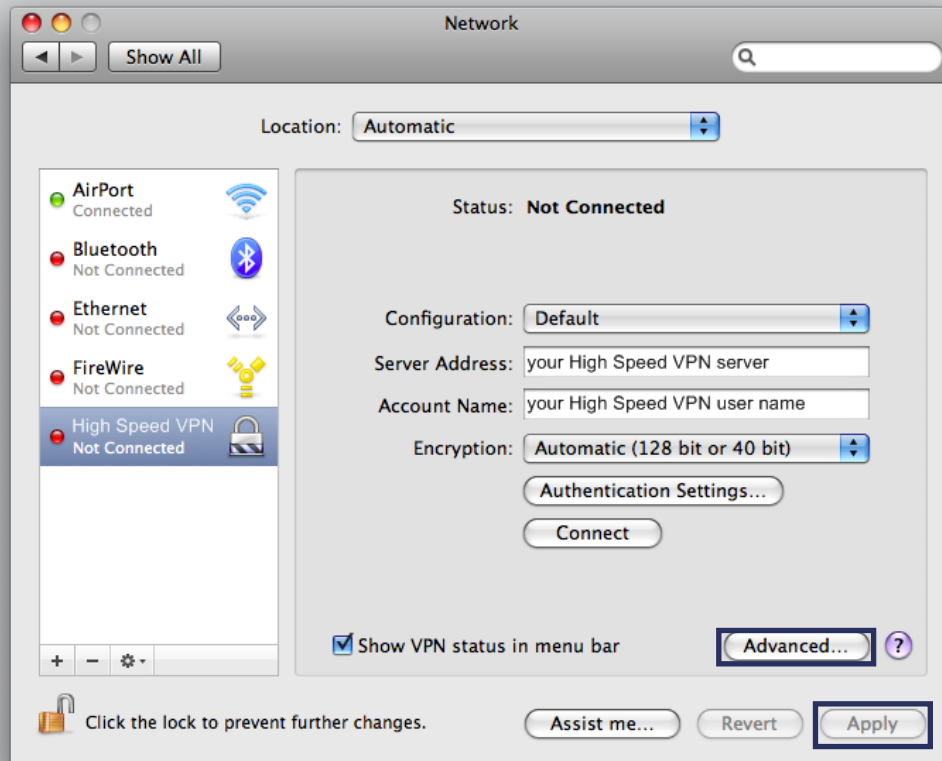

b) Input your High Speed VPN Account password and your preshared key. Click "OK".
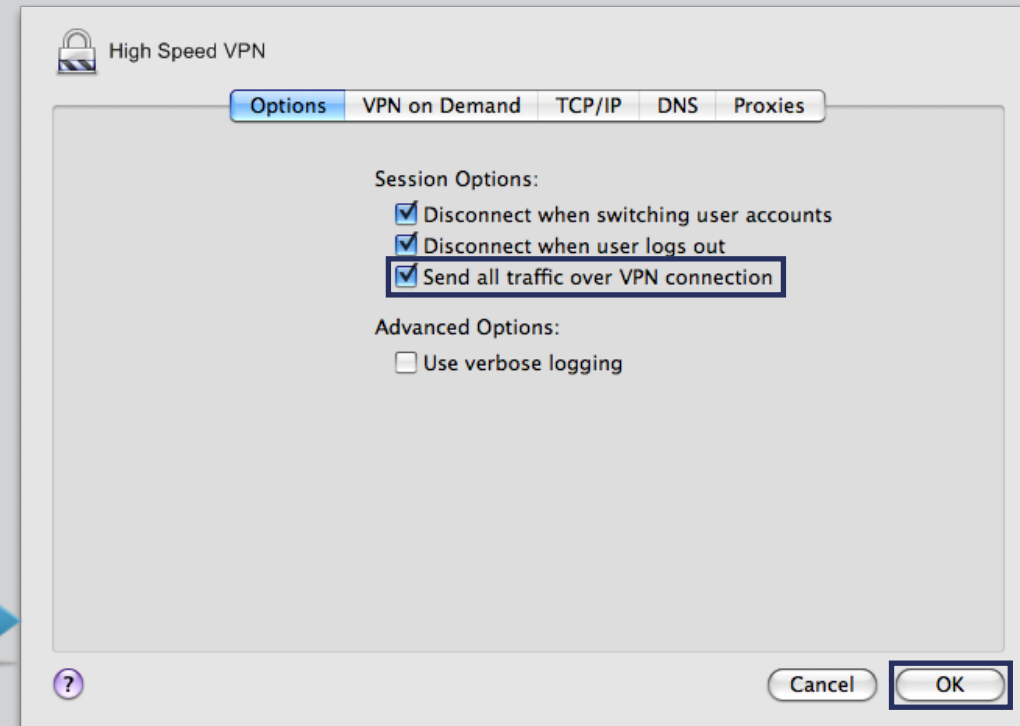

www.highspeedvpn.com

Step 4

a) **Click on "Advanced".**

b) **Make sure the "Send all traffic over VPN" option is checked and click "OK".**

c) Click on **"Apply" to save the connection.**

Step 5

To connect to High Speed VPN click on the VPN icon in the menu bar at the top corner and select "Connect High Speed VPN".

Thank you for your time and consideration.

Please contact us if you have any problems setting up your connection with High Speed VPN.

We will answer as soon as possible, but no more than 12 hours.

Kind regards,

HSVPN Team
